

CLAIMS

1. A telephone transmitter/receiver comprising: a casing having a speech sending opening and a speech receiving opening; a microphone
5 arranged in said speech sending opening; a bone conduction loudspeaker arranged in said speech receiving opening; an amplifier arranged in said casing and connected to said bone conduction loudspeaker; a connection cord having a telephone connector which can be inserted into a jack of a telephone main body and connected
10 to both said microphone and said bone conduction loudspeaker; and, a power supply connection cord connecting said amplifier to an AC adapter.

2. The telephone transmitter/receiver as set forth in claim 1,
15 wherein said power supply connection cord is provided with a DC jack which is capable of receiving a DC plug of said AC adapter therein in an insertion manner.

3. The telephone transmitter/receiver as set forth in claim 1,
20 wherein said power supply connection cord is provided with said AC adapter in its front end.

4. The telephone transmitter/receiver as set forth in any one of claims 1 to 3, wherein said casing is provided with an on-off
25 switch of a power source for energizing/de-energizing said amplifier.

5. The telephone transmitter/receiver as set forth in claim 4, wherein: a turn-on operation of said on-off switch is carried out

by taking up said telephone transmitter/receiver from said telephone main body; and, a turn-off operation of said on-off switch is carried out by putting down said telephone transmitter/receiver onto said telephone main body.

5

6. The telephone transmitter/receiver as set forth in any one of claims 1 to 5, wherein said bone conduction loudspeaker is arranged in said speech sending opening in a manner such that said bone conduction loudspeaker is exposed to the outside.

10

7. The telephone transmitter/receiver as set forth in claim 6, wherein said bone conduction loudspeaker is arranged in said speech sending opening in a manner such that said bone conduction loudspeaker is capable of performing a spherical motion.

15

8. The telephone transmitter/receiver as set forth in claim 6 or 7, wherein said bone conduction loudspeaker is arranged in said speech sending opening in a manner such that said bone conduction loudspeaker is capable of moving in a longitudinal direction of said casing.
